

A320 North of Woking

Construction Phase Newsletter

Issue 4 | **October 2026**

Dear Resident

Welcome to the fourth edition of our newsletter for the A320 North of Woking Improvements Scheme.

In this edition, we provide an update to the ongoing works at:

- Holloway Hill,
- M25 Junction 11,
- St Peters Way,
- The Ottershaw Roundabout.

Over the course of the project, we aim to keep the community updated on our site progress and informed on upcoming works.

St Peters Way

Works to increase capacity at the St Peters Roundabout are complete, with additional lanes on the roundabout and a new third lane on the eastbound St Peters Way towards the M25. The roundabout is now fully signalised, and Surrey County Council are working to optimise the signal phases to improve traffic flow.

Holloway Hill

Under the road closure of Holloway Hill and Hardwick Lane, works are progressing well to construct a new, large gyratory replacing the pre-existing two mini roundabouts.

Over the last few months, the team have been working with various utility companies who are carrying out underground diversions to their pre-existing assets, enabling the construction of the design's new road alignment. Unforeseen complexities with the utility diversions have led to a delay to the reopening of Holloway Hill.

Holloway Hill is expected to re-open in early 2027, with the entire roundabout scheme continuing until late 2027.

The new Holloway Hill roundabout will travel around a large drainage pond, that has recently been excavated by the team, as seen on the picture overleaf.

M25 Junction 11

Most recently, our works on the M25 Junction 11 have recommenced. With two weekend closures of the M25 exit slips in late September / early October, the team successfully carried out the underground installation of new drainage and cabling that will power future street lighting and traffic signals.

Our work on the M25 Junction 11 will see the construction of a new lane on the M25 exit slips in both directions and see the entire junction becoming fully signalised.

Lane closures will be needed on the slip roads to complete the works; we will share more details as dates are confirmed.

Ottershaw Roundabout

The work remains paused while we continue to follow all required processes set out by the county planning authority. We appreciate that residents want to know when works will start again, and we plan to provide an update once the planning matters are concluded.

MyTime Chertsey

GRAHAM has supported local NHS learning disability and wellbeing service MyTime in Chertsey by supplying and constructing a new outdoor summerhouse and enhanced garden space, helping to create a welcoming environment for service users, staff and visitors.

The site team were invited to formally open the garden space in July and join the facility's staff and guests for a tea party.

"Massive thank you to the Graham team for creating a safe and exciting new place for the people we support. You all worked so hard and were very professional in your work and even took time out to interact and get to know the people we support.

It has made a huge difference to the people, getting them outside to enjoy the safe space you have made. They can relax, enjoy the garden, and decorate the summer house with some of their fantastic artwork" We all thank you so very much!"
- Kelly Wakelin, Team Leader, MyTime Chertsey.
